

To whom it may concern

Emanuel Pelin

I would confirm that Mr Emanuel Pelin has worked for Braemar Engineering on the following new building project:

Ship Owner: Bonny Gas Transport  
Vessel Type: LNGC  
Shipyard: Samsung Heavy Industries, Geoje, South Korea  
Designation: Lead Hull Inspector  
Duration: April 2014 – July 2016

Emanuel has been conscientious and hard-working throughout his time on the project, which has now come to its end after the delivery of 4 LNGCs. His commitment to achieving high quality and productivity without compromising on the owner's standards for HSSE and work ethics has been commendable. He has been an integral part of the team for the successful delivery of the project from start to finish.

I would have no hesitation in recommending Emanuel for employment for site supervision on new building projects, and wish him all the very best for the future.
